## REMARKS.

When gold coins have been clipped, or made light by any other process, the following will enable you to ascertain their value—the test is with American silver.

Half-Eagle is equal in weight to \*...31½ cents of silver.  
Sovereign is equal in weight to....30 cents of silver.  
Napoleon is a shade lighter than...25 cents of silver.

X-Thaler is a shade lighter than...50 cents of silver  
Ten Guilder is equal in weight to...25 cents of silver  
Doubloon is equal in weight to...100 cents of silver

\* An American quarter and a fair Spanish sixpence.

## RULES TO BE OBSERVED IN USING THIS COIN CHART.

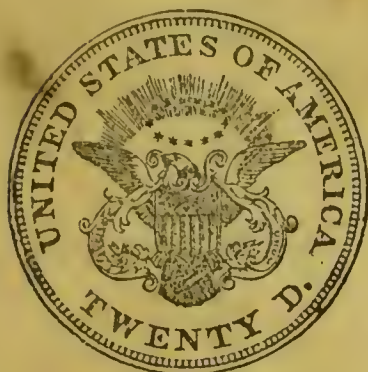

Those Coins used in Commerce: such as Sovereigns, 20 Franc Pieces, X Thalers, Spanish and Patriot Doubloons and Dollars, &c., will of course fluctuate, with the difference between demand and supply. Their quotation in this book can only correspond with their value in trade, and what they are actually worth in passing from hand to hand.

Other pieces there are among the Silver Coins, (indicated by an asterisk \*,) which in many cases fall short in weight or fineness, and are not worth what the full weight and standard pieces are. These we have quoted low, to meet the value of the depreciated pieces.

Moidore, \$4 75

Moidore, \$6

Moidore, \$4 75 [Brazilian.]

Half-Joe, 8 50

NOTE.—It is not uncommon for Doubleons and parts of Doubleons to be light—Doubleons should be as heavy as American dollars. An act of Congress, March 3, 1843, legalized this kind of gold at 89 cents 9 mills per dwt. When light its true value may be got at by weighing it with American silver, allowing 77 cents for the weight of a five cent piece. Portugal and Brazil pieces can be tested by allowing 80 cents for the weight of a five cent piece.

\* The Double Ducat, (value \$4,40,) so closely resembles the Sovereign, as to be distinguished only by its weight, being a thinner piece.

The foreign gold circulating in this country, will average 1 to 2 per cent less than the standard; we have therefore made our quotations to correspond with the weight of each piece.
